Admiral Markets AS to receive the highest recognition in a family friendly Employer label program

Admiral Markets AS has been awarded with the gold level, the highest recognition, in a family friendly Employer label program of the Estonian Ministry of Social Affairs. Family-Friendly Employer Label is a program that the Ministry of Social Affairs and its partners started to develop in Estonia in 2016.

The Family Friendly label program aims to express recognition and support to employers who value and implement best practices of combining work and family life, who create a working environment and organizational culture that helps to balance work-life and family. The Family-Friendly Employer label model includes a lot of different categories, for example, recognition and motivation, health promotion, the atmosphere of communication, synergy and culture, etc.

„Admiral Markets believes in the idea of togetherness. As the global team of Admiral Markets is absolutely outstanding, we are driven by the desire to enable them a family friendly environment,“ said Jens Chrzanowski, Management Board Member of Admiral Markets Group AS. „This benefits also for the success of our company as our team members are the greatest asset a company could ever have. Diversity in our organization is highly valued and by encouraging a safe, respectful and professional work environment has resulted in a recognition that we are very proud of,“ he added.

The process of applying for the Family-Friendly Employer label consists of three different stages, the main part lasting for up to three years. During this time, the applicant must complete the substantive work of approximately 120 hours. The Family-friendly Employer label has three levels: gold, silver and bronze. Different labels represent the levels the employer has reached in terms of applying family-friendly organizational culture and working environment.

This year the awards were handed over virtually by the Minister of Social Affairs Tanel Kiik and the Minister of Population Riina Solman.
